

October 25, 2007

Attn: Ms. Lilia G. Judson, Esq.
Executive Director
Indiana Supreme Court
Division of State Court Administration
115 West Washington Street, Suite 1080
Indianapolis, IN 46204

Dear Ms. Judson;

In accordance with Administrative Rule 9: Access to Court Records, paragraphs (F)(2) and (F)(3), Doxpop, llc, hereby requests access to bulk data/compiled information not excluded from public access for the courts of Monroe County, Indiana.

Enclosed with this letter, you will find the request specifics in the format suggested in the Public Access to Court Records Handbook and "Attachment A" specifying the information requested.

To facilitate swift action on this request, we have made this request for a single court jurisdiction and we have ensured that it does not differ substantially from our previous two AR-9 requests, which were granted.

Although we have used the standard suggested format for this request, I would like to call attention to two aspects of this request that did not fit neatly into the format:

First, Doxpop is requesting access to regular updates in addition to an initial export of current information. We have been advised that the Odyssey Case Management System currently being installed in Monroe County is capable of responding to event "triggers" by exporting information associated with the event. We seek access to a stream of event-triggered data exports. We believe utilizing these existing export capabilities will minimize the effort required to provide access.

Second, Doxpop is specifically requesting access to the data elements listed in Attachment A. However, because it is our intent to minimize the impact of our request on public resources, we are quite willing to amend the specifics of our request to conform to the existing export capabilities rather than cause the Odyssey system administrators the extra work involved in creating a custom export for our needs.

Please do not hesitate to contact us if other materials or information are required to process this request.

Best Regards,

Nick Fankhauser,
VP Product Development, Doxpop LLC
